## Aloha LoveTribe Solstice Blessings,

Joyful solstice as we move through this "portal" into the "Age of Aquarius" that has been "dawning" the last 40+ years.

I was with my elder wise women last night for our yearly Solstice gathering. We bring in the light while also acknowledging the darkness we have come through and still present. We broke into smaller groups of three near the end to share our personal journeys.

One of the women shared that she has been feeling a lot of anxiety and was having trouble letting in the light. Although in the meantime holding and protecting her flame within. The other woman asked her where the light wanted to come in, in her body. She said, her head, but realized she had been blocking that as she thought it should enter through her heart. After laughing about that we could see the light enter!

The other woman shared a great loss that happened last year. This last year she has been in the grief and darkness of that immense loss. She shared that she realized she could be in that grief and darkness and at the same time she was able to let in joy and light. They weren't mutually exclusive. And she did bring in so much light with her love, appreciation and presence with us as well as the many people she touches. This is a great lesson for us and for these times.

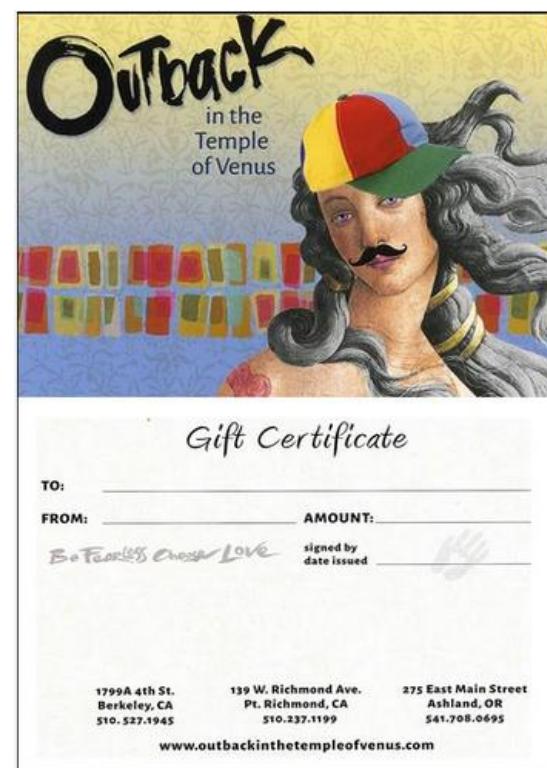

Honor the darkness and bring in deLight. Moment by moment.

You are blessed and my gift to you this season is one of these Blessed t-shirts. They can be worn as an undershirt to keep you warm and blessed or as an over shirt to remind others they are blessed. Yes, the sizing is limited (s-xxl), so you can also gift to another sharing the blessing (or make a pillow out of it!). We can send it with your online order, email us or for phone order specify, for color and size or pick up when you come in. If we run out of your size, you can get a raincheck for the next shipment.

May you feel the love to ease you through this transition into the light. I love you, Devi
